Portfolio Project

Daniel Ade

PURPOSE

Create a means for potential employers or clients to contact me

Stay connected through social media with potential clients or colleagues

Exhibit a work history and background which also accentuates my strengths, skills and personality

Create a site where I can blog...compete with Medium...make millions?

SITE MAP

Four Main Pages in HTML

   Home Page

     Bio Page

     Blog Page (links to 5 blog posts)

     Etc (Interests) page

Style:

     CSS via SCSS
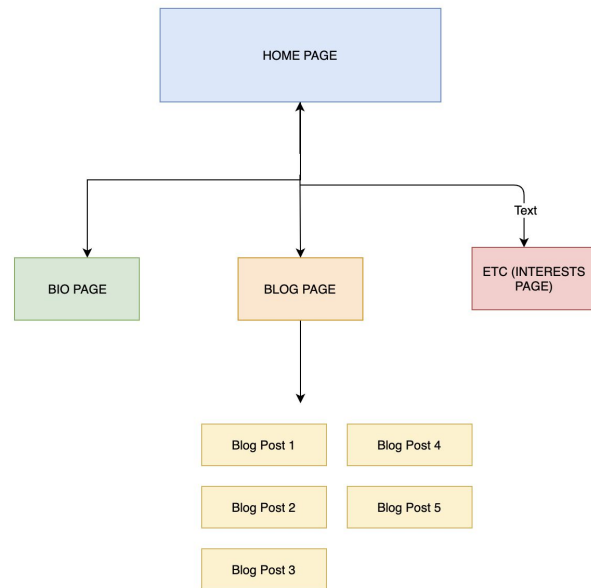

SITE MAP

Navigating between pages:

      Hamburger icon (All pages)

      Direct Links (on Home Page)

      Footer (link to Home page)

Links to social media on each site

Wireframing & Planning Aesthetics

Initial Goals:
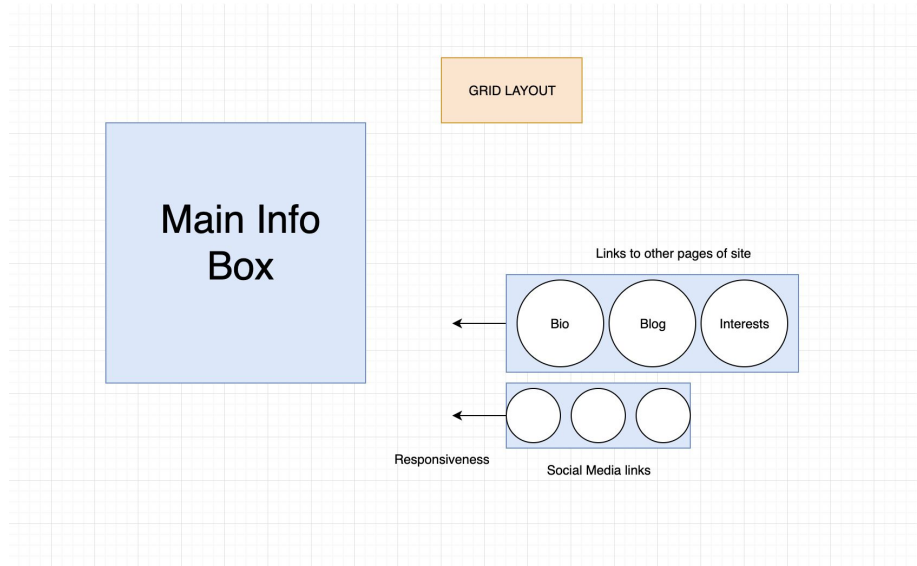

Simple yet sleek

Contiguous theme (dark/city shades)

Clear links and layout

Room to add to later on (with javascript, etc)
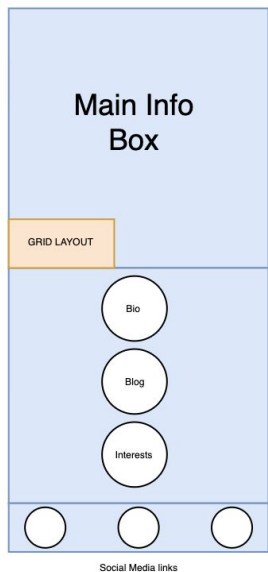

Responsiveness (utilizing grid)

Wireframing - Main page

GRID LAYOUT

Main Info
Box

Links to other pages of site

Bio

Blog

Interests

Responsiveness

Social Media links

Desktop layout (>1201px)

Tablet Layout
(851-1200px)

GRID LAYOUT

Main Info
Box

BIO

BLOG

INTERESTS

Links to other pages of site

Social Media links

Wireframing/Aesthetics - Main page

Main Info
Box

GRID LAYOUT

Bio

Blog

Interests

Social Media links
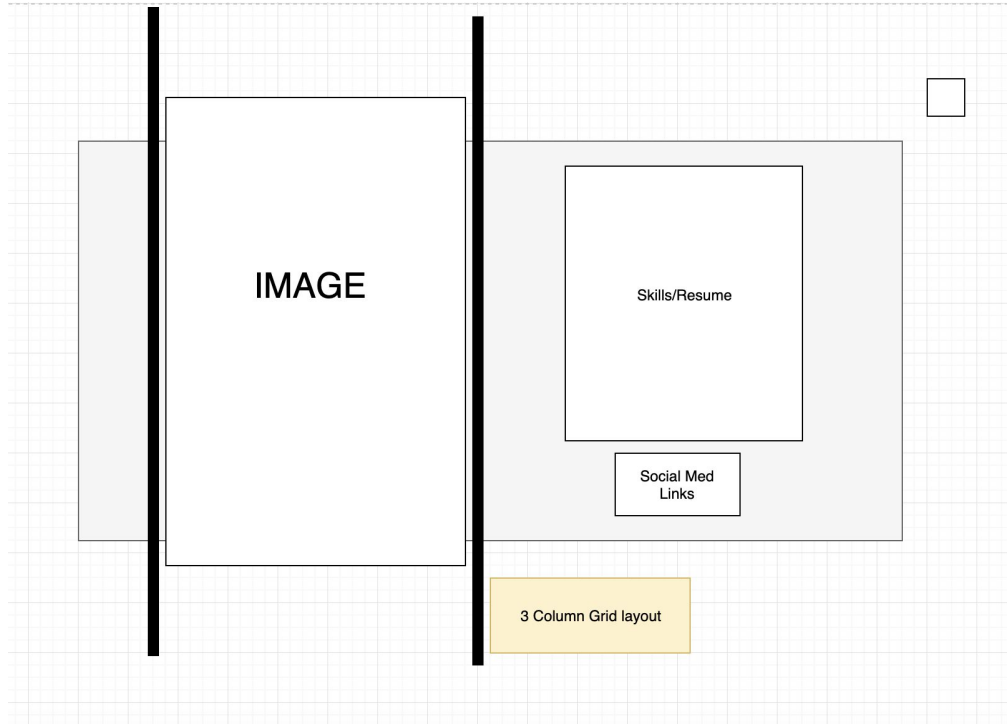

Phone/Tablet (<850px)

Final: Interactive <a> links with pictures to
rest of site
Hamburger drop down bar
Links to social media

Wireframing Bio page

IMAGE

Skills/Resume

Social Med
Links

3 Column Grid layout

3 Column Grid Design

Image column static

Skills column flexible
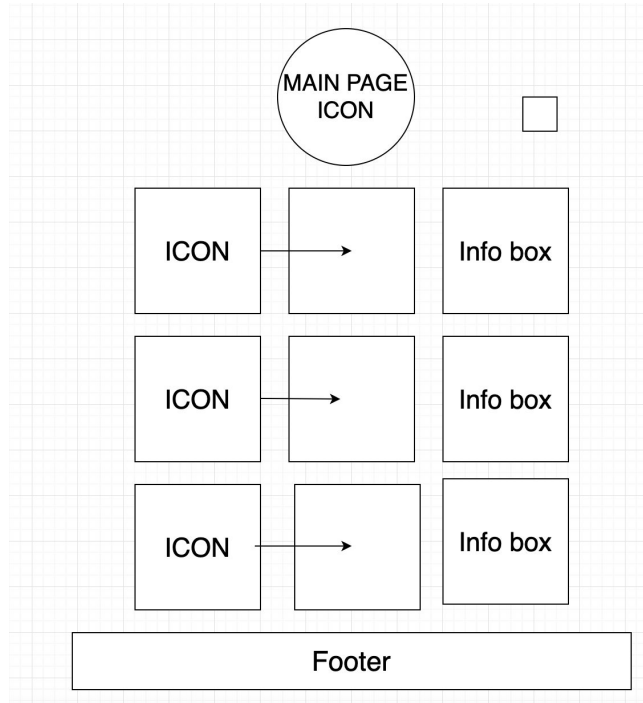

Wireframing/Aesthetics Bio page

Final (Desktop):
Resume link
Social Media Links
Hamburger nav link

Responsiveness <950px

Wireframing "ETC" page

Info boxes on interests
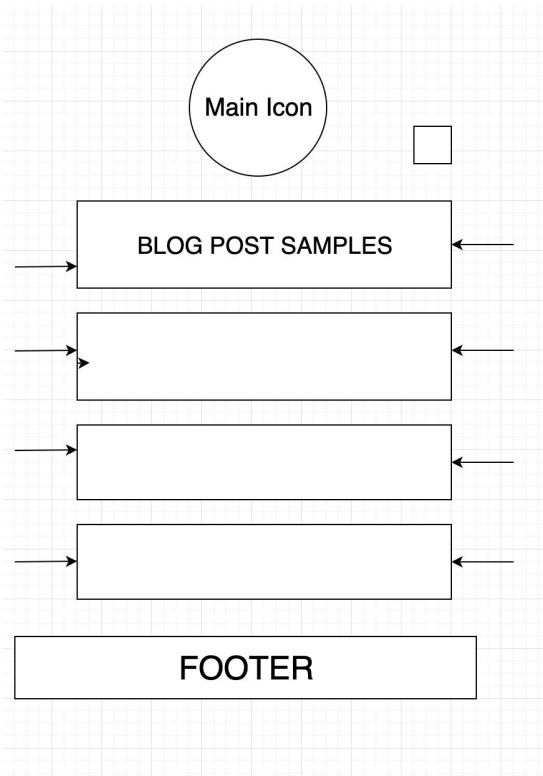

Boxes that translate on hover and reveal content

Aesthetics "ETC" page

Grid-column-gap disappears for responsiveness

Interactive :hover scrolling pictures to illustrate interests

Wireframing Blog page

Main Icon

BLOG POST SAMPLES

FOOTER

Main blog site with samples of blogs linking to blog articles

Margins decrease to create responsiveness <700px

Aesthetics Blog page

Links highlight and scale(1.1) to help direct and engage the viewers.

Hamburger nav icon

Footer with home link and social media links

Challenges

Refactoring

      Including mixins and variables at the end

:hover translation

      Not sticking

Learning curve at the start

      Where to begin? High expectations in initial wireframes
